

Liquid Helium Level Sensors

Standard sensors are available in three different outside diameter sizes and in active sensing lengths from 1cm to 200cm, in integral multiples of 1cm. Each sensor has an overall length 2cm greater than the active sensing length. All standard sensors are provided with four 30cm long #30 AWG teflon insulated leads for internal cryostat connections (color-coded, twisted phosphor-bronze leads are available).

Custom sensors are also available.

Available Models

Model	Outside Diameter	Active Sensing Lengths
2D	4.76 mm O.D. (3/16")	1 to 43 cm active sensing length
3D	6.35 mm O.D. (1/4")	1 to 109 cm active sensing length
3DA *	6.35 mm O.D. (1/4")	1 to 109 cm active sensing length
4D	9.52 mm O.D. (3/8")	110 to 200 cm active sensing length
FLEX	9.52mm O.D. (3/8") Flexible	Up to 200 cm active sensing length
